DATE MAILED: 10/23/2002

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.
09/391,427

Applicant(s)
Myers et al.

Examiner
Alexander Kalinowski

Art Unit
3626

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on Aug 11, 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11; 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 12-25 and 38-47 is/are pending in the application.
- 4a) Of the above, claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 12-25 and 38-47 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claims _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgement is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
*See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e).
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892) 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 2) ☒ Notice of Draftsperson's Patent Drawing Review (PTO-948) 5) ☐ Notice of Informal Patent Application (PTO-152)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s). _____ 6) ☐ Other:

Art Unit: 3626

DETAILED ACTION

1. Claims 12-25 and 38-47 are presented for examination.

Election/Restriction

2. Applicant's election without traverse of claims 12-25 and 38-47 in Paper No. 9 is acknowledged. Furthermore, Applicant canceled the nonelected claims, namely, claims 1-11, 26-37 and 48-58.

Specification

3. The abstract of the disclosure is objected to because the abstract is greater than 150 words. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 12-14, 16-25 and 38-47 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zeitman, Pat. No. 5,940,481 in view of Yoshida, Pat. No. 5,877,704.

Art Unit: 3626

As to claim 12, Zeitman discloses a method performed by a customer communication device operated by a customer, in a combination reservation and navigation system (i.e. parking management)(see Fig. 1 and abstract), comprising the steps of accessing reservation information representing a good or a service that may be reserved by customers from one of a plurality of businesses(i.e. user may reserve a parking facility)(col. 5, lines 1-5); making a request for a reservation of the good or the service responsive to the step of accessing the reservation information (col. 5, lines 7-9); receiving confirmation information, representing that the reservation has been made for the good or the service associated with one of the plurality of businesses, responsive to the step of making the request(i.e. receives confirmation of authorization to park there)(col. 5, lines 15-18); and receiving electronic navigation information from a reservation communication device over a communication link responsive to the step of receiving the confirmation information, wherein the electronic navigation information assists the customer in traveling from a customer geographic location to a business geographic location of the good or the service reserved by the customer (i.e. map of region in which user is interested in parking)(col. 5, lines 5-7). Zeitman does not explicitly disclose receiving electronic navigation information upon receiving confirmation information.

However, Yoshida discloses receiving electronic navigation information upon receiving confirmation information (col. 4, lines 1-7 and lines 44-58). It would have been obvious to one of

Art Unit: 3626

ordinary skill in the art at the time of Applicant's invention to include receiving electronic navigation information upon receiving confirmation information as disclosed by Yoshida within Zeitman for the motivation of placing a reservation for a parking space from a remote site and provide roadway information as well (col. 1, lines 32-40 and col 4, lines 1-7).

As to claim 13, Zeitman discloses a method according to claim 12 further comprising the steps of transmitting a payment to one of the reservation communication device and a business communication device for the good or the service associated with the reservation responsive to the step of making the request for the reservation (i.e. billing apparatus)(col. 3, lines 23-32); and receiving receipt information representing that the payment has been received by the one of the reservation communication device and the business communication device responsive to the step of transmitting the payment(col. 3, lines 23-32) .

As to claim 14, Zeitman does not explicitly disclose a method according to claim 12 further comprising the step of

transmitting a request for the electronic navigation information responsive to the step of receiving the confirmation information.

However, Yoshida discloses receiving electronic navigation information upon receiving confirmation information (col. 4, lines 1-7 and lines 44-58). It would have been obvious to one of

Art Unit: 3626

ordinary skill in the art at the time of Applicant's invention to include transmitting a request for the electronic navigation information responsive to the step of receiving the confirmation information as disclosed by Yoshida within Zeitman for the motivation of placing a reservation for a parking space from a remote site and provide roadway information as well (col. 1, lines 32-40 and col 4, lines 1-7).

As to claim 16, Zeitman discloses a method according to claim 12 further comprising the step of negotiating with the reservation communication device for the good or the service desired by the customer responsive to the reservation communication device auctioning the good or the service to the customer (i.e. the next time a potential user ... wishes to park in the reserved facility and communicates with central computer unit 12, the user receives a message that the facility is reserved and not authorized for use)(col. 5, lines 1-17).

As to claim 17, Zeitman discloses a method according to claim 12: wherein the steps of accessing the reservation information, making the request and receiving the confirmation information are performed by a fixed customer communication device (i.e. computer)(col. 3, lines 19-22), and

Zeitman does not explicitly disclose

Art Unit: 3626

wherein the step of receiving the electronic navigation information is performed by a mobile customer communication device.

However, Yoshida discloses receiving electronic navigation information upon receiving confirmation information i.e. vehicle mounted device)(col. 3, lines 62-67 and col. 4, lines 1-7 and lines 44-58). It would have been obvious to one of ordinary skill in the art at the time of Applicant's invention to include wherein the step of receiving the electronic navigation information is performed by a mobile customer communication device as disclosed by Yoshida within Zeitman for the motivation of placing a reservation for a parking space from a remote site and provide roadway information as well (col. 1, lines 32-40 and col 4, lines 1-7).

As to claim 18, Zeitman discloses a method according to claim 12 further comprising the step of communicating the confirmation information to the one of the plurality of businesses located at the business geographic location responsive to the customer arriving at the business geographic location (user may report his arrival to central control unit or parking attendant)(col. 3, lines 58-63).

As to claim 19, Zeitman discloses a method according to claim 18 wherein the confirmation information is communicated to a business communication device, associated with the one of the plurality of businesses, at the business geographic location over a radio frequency

Art Unit: 3626

communication link responsive to the customer communication device being proximate to the business communication device (col. 4, lines 13-23).

As to claims 20, 21, and 23-25, the claims are similar in scope to claims 12-14, and 16-19 and are rejected on the same basis.

As to claims 38-47, the claims are the corresponding apparatus claims to method claims 12-14, 16-21, and 23-25 and are rejected on the same basis and claims 12-14, 16-21, and 23-25.

6. Claims 15 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zeitman and Yoshida as applied to claims 12 and 20 above, and further in view of Sehr, Pat. No. 6,085,976.

As to claim 15 and 22, Zeitman and Yoshida do not explicitly disclose a method according to claim 12 wherein the customer information includes a customer profile representing preferences of the customer for the good or the service desired by the customer.

However, Sehr discloses the customer information includes a customer profile representing preferences of the customer for the good or the service desired by the customer (i.e. passenger's purchase habits)(col. 6, lines 10-15). It would have been obvious to one of ordinary skill in the art at the time of Applicant's invention to include the customer information includes a

Art Unit: 3626

customer profile representing preferences of the customer for the good or the service desired by the customer as disclosed by Sehr within the Zeitman and Yoshida combination for the motivation of providing better quality of service (col. 2, lines 7-14).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a. Pat. No. 5,432,508 discloses a system for monitoring a parking facility.
- b. JP401023399 discloses a parking facility managing system.
- c. "DFW international Airport Adds New Level of Convenience with Nonstop, Automated Parking Payment System" discloses an automated parking payment system that monitors parking facility usage.
- d. "Not your father's parking garage" discloses a parking facility management system.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Kalinowski, whose telephone number is (703) 305-2398. The examiner can normally be reached on Monday to Thursday from 6:30 AM to 4:00 PM. In addition, the examiner can be reached on alternate Fridays.

Art Unit: 3626

If any attempt to reach the examiner by telephone is unsuccessful, the examiner's supervisor, Joseph Thomas, can be reached on (703) 305-9588. The fax telephone number for this group is (703) 305-7687 (for official communications including After Final communications labeled "Box AF").

Hand delivered responses should be brought to Crystal Park 5, 2451 Crystal Drive, Arlington, VA, 7th Floor, receptionist.

A handwritten signature in black ink, appearing to read "Alexander Kalinowski".
